

# GGEM Farming Covid19 Response Report

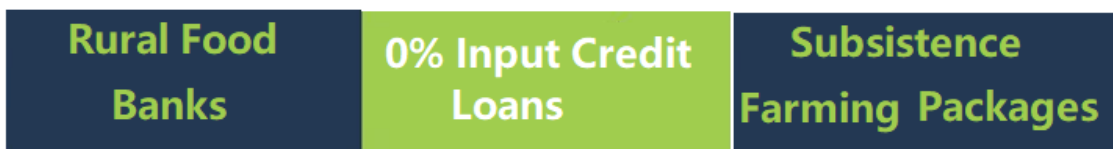

As borders close around Malawi, interrupting the flow of imports and increasing the cost of basic food. The GGEM Farming team are prioritizing the development of long term joint community solutions that will monitor food access dynamics, ensure instant and safer payments for our farmers- while continuing to promote healthy hygiene practices through our Field Extension Network.

## What's Next?

As we track the daily changes of our new reality, we are continuing to put our Farmers First. We are also tracking commodity market changes in order to safeguard fair prices for our farmer's produce and food access for our rural communities. ***What this means is:***

- GGEM Farmers will receive **fair market value prices** for their produce despite current trends which indicate price depression due to added pressure on food supply within country
- This harvest season, we expect over **200MT (approx. 450,000lbs)** generated via GGEM Farmers which we will proudly contribute towards securing Malawi's Landlocked food supply chain during these uncertain times
- **We are looking ahead** to ensure our farmers will be able to access both food and inputs to continue food production in what will be a leaner income year globally

## Areas under development include:

Your continued support is more important than ever for us to keep our rural agri-based economies that **feed over 80% of the world** in motion- resulting in food on all of our plates. **Thank you.**
